

DELIVERING HIGH QUALITY CIVIL & GROUNDWORK SOLUTIONS THAT STAND THE TEST OF TIME

We pride ourselves on working collaboratively with our clients to deliver professional, cost effective, quality civil & groundwork solutions

We deliver civil & groundwork solutions, building a reputation of trust with our clients by providing top-quality work at competitive rates, respecting the importance of timely completion

ABOUT J FROST CIVILS

Building lasting relationships and trust in every endeavour

J Frost Civils was founded on the belief we can deliver an exceptional service, at a competitive rate, working collaboratively with our clients to ensure every project not only meets but exceeds expectations.

WHAT SETS US APART?

Skilled and dedicated team- our teams are our biggest assets, we invest in continuous training and development to ensure they are equipped with the latest knowledge and skills.

Flexible and responsive- due to our years of industry experience we understand every project is unique. We believe effective communication, an adaptable approach and our understanding of client's specific needs are key to delivering an excellent service.

Safety First- safety is our top priority, we adhere to the highest safety standards and regulatory requirements, creating a secure working environment for our teams and clients.

Competitive pricing- we provide top-quality work at competitive rates offering great value without ever compromising on quality.

Comprehensive project management- from initial scope & quote, to permits, documentation, project execution and completion we handle every aspect with meticulous attention to detail, keeping our clients informed at all stages.

Creative problem solving- our knowledge and experience allows us to find the best solution for even the most complex projects.

Transparency and integrity- we firmly believe honesty is the best policy and maintain open and honest communication with our clients, from clear detailed quotes, to regular updates we ensure you are informed every step of the way. No unexpected costs and no unwanted surprises.

Our clients are the core of our business. We want to build long lasting relationships and become your trusted partner in Civil and Groundworks.

WHO WE ARE

Jamie Frost our Managing Director and the name behind J Frost Civils, has learnt his trade from the ground up, or in his case the roof down. From starting out as a general labourer to leading as our Managing Director Jamie embodies our companies growth and dedication. With hands on experience across every level of the business Jamie has a deep understanding of the industry and a proven track record of delivering successful projects. Jamie's journey reflects his commitment to hard work, continuous learning and exceptional leadership, and it is that determination which drives our passion for upholding the highest standards of quality and safety, ensuring successful project outcomes and developing lasting relationships with our clients.

Emma Hobson is another one of our owners and Chief Operating Officer. After gaining a LLB in Law, Emma went into procurement, before joining the water utilities sector developing her career in contract and relationship management and then project management. Emma's journey reflects a deep understanding of operational efficiency, strategic procurement and industry best practices.

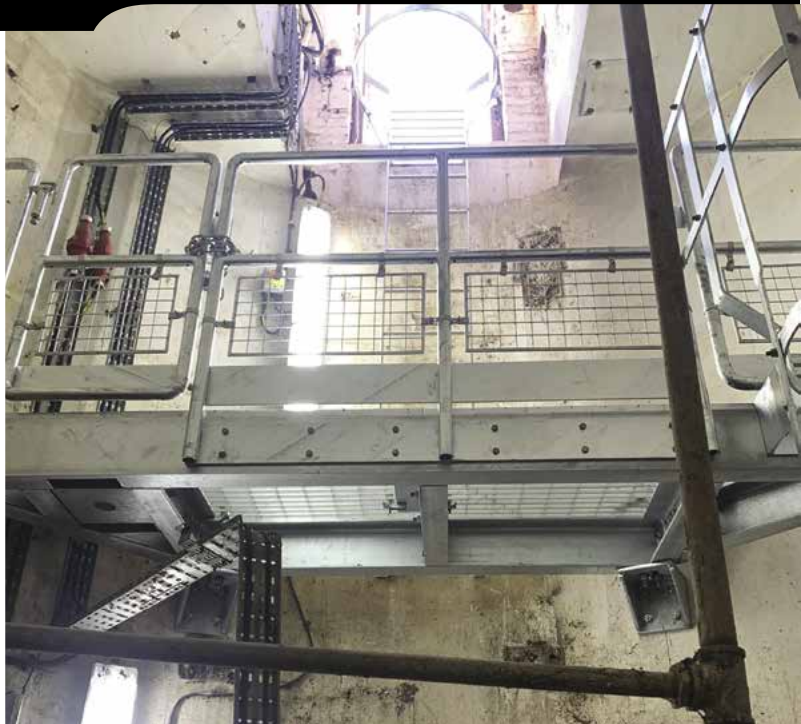

As COO Emma now leverage's her experience to streamline operations, enhance productivity, develop strong collaborative relationships with clients and suppliers and ensuring our projects are executed with efficiency, aligning to our values and vision to deliver high quality projects on time, on budget and safely.

Our workforce are the backbone of our company and integral to us being able to deliver the high quality results we pride ourselves on. Comprising of highly competent and dedicated individuals who are committed to delivering exceptional results for our clients. Each team member brings experience and expertise in civil and groundwork services and plays a crucial role in executing our high standards of quality and safety. Our teams are trained to handle projects of all scales with precision and attention to detail. We invest in ongoing training and development to meet our clients needs which enables us to tackle even the most challenging projects. All our supervisors hold a minimum SSSTS certification and every member of the team is first aid trained.

RECENT PROJECTS

Steining Avenue

OVERVIEW

To design, fabricate and install internal steel access platforms within a dry well, ensuring safe and efficient access for maintenance and operations.

DURATION - 16 DAYS

APPROACH

We have developed strong relationships with our supply chain, and collaborating with them for this project allowed us to offer our client the full package of works. J Frost Civils undertook the ground works elements, project management and site supervision, ensuring sub-contracted works were delivered to our clients schedule and providing one line of communication as to project progress. Our expert fabrication partner ensured all steel works were fabricated and installed to the specifications and plans approved by J Frost Civils and the client. Thorough inspection and testing was carried out to ensure all installations were compliant with safety regulations and project specifications. Load testing and certification was performed to confirm the platforms could safely support the intended weight. All documentation was provided to the client on handover of the project. Rigorous quality control measures were implemented to guarantee the highest standard of workmanship throughout all stages of the project.

OUTCOME

Our client has safe, secure and accessible steel platforms within their dry well, providing reliable access for their employees and other contractors to conduct routine maintenance and operational works.

Worthing

OVERVIEW

Installation of 4 new concrete plinths for supporting blower kiosks and new internal assets. Tight programme schedule due to commissioning and decommissioning undertaken between each plinth construction.

DURATION - 24 DAYS

APPROACH

Conducted a thorough site assessment in conjunction with the client and their design team to ensure exact dimensions were marked out aligned to plans. Excavation undertaken with site utilities identified and highlighted. Construction of two tiered formwork to the specified dimensions, securely positioned and reinforced with rebar to withstand the pouring process. Poured concrete to a C35 specification ensuring even distribution, use of vibrating poker to eliminate air pockets and ensure proper compaction. Levelled and smooth surface for a uniform finish. Standard curing practices followed to achieve desired strength and durability, prior to careful removal of formwork and visual inspection for any imperfections. Final inspection carried out with client to ensure all specifications and quality standards met expectations. Quality control measures implemented throughout and cube test results issued to client.

OUTCOME

A robust and level concrete plinth that provides a structurally sound, stable, durable foundation ensuring long-term performance and reliability.

Stonegate

OVERVIEW

To provide a safe and efficient point of entry system into wet well for maintenance, inspection and safe removal of assets purposes.

DURATION - 12 DAYS

APPROACH

We developed a detailed plan and design for the entry system including access points, safety features and compliance with industry standards, along with the ability for our client to gain access to assets for any replacement, repairs or inspections. Prior to work being undertaken we established comprehensive temporary safety protocols for entering and working within the wet well, including internal safety deck to protect damage to assets. We carried out the construction, formwork and installation of a new 9" brick chamber, which incorporated all existing services. A new access cover was designed, fabricated and installed with a fall arrest safety grill, meeting industry specification. Thorough inspection was undertaken prior to handover to ensure all installations complied with safety standards and project specifications.

OUTCOME

Our client has a secure entry system, which provides them with safe access to their wet well, allowing them to conduct maintenance, inspections and removal of assets.

WHAT OUR CUSTOMERS SAY ABOUT US

“From start to finish the client engagement was second to none. From initial requirements gathering to faultless execution of all deliverables the whole team exceeded our expectations. And that is no easy thing to do! Professional, client focussed & delivery orientated - we highly recommend approaching J Frost Civils to see how they can help.”

SIMON EDWARDS

“Team Members of J Frost Civils have attended our Training School on various occasions and for various courses. I cannot believe how far they have come in such a short time, and it shows that starting off on the right foot, with the right training from the offset, ensured J Frost delivered their promise of Health and Safety first. The team members arrived in a positive light, professional, and were always timely, in fact their attitude was terrific. We would eagerly encourage other businesses to work with J Frost and benefit like we did. We look forward to working with you again very soon.”

CHERYL MUNDAY OF CANNING & COYLE CONSTRUCTION

“Having worked with J Frost Civils on more than one occasion I found them organised, professional, knowledgeable and very supportive, their work ethic and togetherness was a pleasure to witness, GS Water would more than recommend and we can wait to work with them again.”

GLEN STOCK, MD OF GS WATER

“Your company is very easy to work with, especially when emergency situations arise. Your attention to detail and knowledge and how you work with your clients is extremely impressive. I can highly recommend your company for the type of work you’ve performed for us on several projects. It’s always a pleasure working with you.”

SJ PROJECT MANAGER

“The ‘J Frost Civils’ site team did a fantastic job in our garden. The team were very professional, tidy, respectful and did an amazing job for us. They went over and above the agreed scope at times to ensure that we were happy with the results, and nothing was ever too much trouble. We would definitely recommend them.”

MICHAEL DUNNE, PROJECT MANAGER OF AQUA CONSULTANTS

“I have had the privilege of collaborating with Jamie and Emma for an extensive period, and I must commend their unwavering commitment to excellence. These individuals consistently exceed expectations, demonstrating an exceptional work ethic and a remarkable dedication to their responsibilities for JFC on the flip side they both play a major role providing me positive actions JFC are great company to be associated with I’m excited to be part on their journey.”

TYRONE TAYLOR OF TAYLORED HIRE

“We have worked with J.Frost Civils on a number of occasions and feel that they always do a really good job and are a pleasure to deal with. We never encounter any problems that they haven’t been able to sort, all their work is done in a timely, professional manner and we feel their services are extremely good value for money.”

SIMON CATTELL SENIOR PROJECT MANAGER
OF MIKE ENGINEERING GROUP

ACCREDITATIONS & INSURANCES

J Frost Civils proudly holds the CHAS Advanced accreditation, demonstrating our commitment to maintaining the highest standards of health, safety and risk management. This advanced level of accreditation reflects our dedication to implementing stringent safety practices and procedures ensuring every project is completed with care and compliance to industry regulations.

We have partnered with Citation for our health and safety management, leveraging their expertise to enhance our safety processes and procedures and ensure our compliance with industry standards. This collaboration assists us with maintaining rigorous practices and providing a secure working environment for our teams and clients.
